PROFESSIONAL SUMMARY

Full Stack Developer with experience in building and deploying scalable web and mobile applications using React.js, Node.js, Express.js, MySQL, MongoDB, JavaScript, and Flutter. Skilled in RESTful API development, JWT/OTP authentication, payment gateway integration, database management, and responsive UI development. Experienced in developing end-to-end solutions including admin panels, consumer applications, partner applications, and backend systems. Proficient in Git, API integration, debugging, deployment, and delivering high-quality software solutions in Agile development environments.

WORK EXPERIENCE

Freelance Full Stack Developer,

06/2025 – Present

Home Services Platform (Web + Mobile) 🔗

- Engineered a full-stack home services platform comprising a Website, Admin Panel, Consumer App, and Partner App using React.js, Flutter, Node.js, Express.js, MySQL, and RESTful APIs.
- Implemented OTP/JWT authentication, Role-Based Access Control (RBAC), and secure authorization workflows for customers, service partners, and administrators.
- Architected scalable backend APIs supporting authentication, booking management, services, partner operations, payments, payouts, and administrative functionalities.
- Designed end-to-end service booking workflows, including service discovery, cart management, slot scheduling, order processing, and real-time tracking.
- Integrated Razorpay payment gateway, online payment processing, and Cash on Delivery (COD) workflows with secure transaction verification.
- Crafted responsive user interfaces, reusable React components, and Flutter mobile applications with seamless API integration and efficient state management.
- Established Admin Panel modules with CRUD operations for managing users, services, bookings, payments, and partner activities.
- Oversaw MySQL database management, API testing, debugging, deployment, and server configuration using PM2 and Nginx.

Frontend Developer, A3HITECH

06/2017 – 01/2020 | Bidar, India

- Developed responsive and interactive web applications using React.js, JavaScript, HTML5, CSS3, Bootstrap, and REST APIs.
- Created reusable React components using Hooks, Props, State Management, and React Router to improve code maintainability and scalability.
- Integrated REST APIs, managed application state, implemented form validations, and resolved frontend issues to ensure seamless user experiences.
- Collaborated with UX/UI designers and backend developers to deliver user-friendly, mobile-responsive, and high-performance web applications.
- Optimized website performance through code refactoring, responsive design techniques, and frontend best practices.
- Utilized Git for version control, code management, and team collaboration throughout the development lifecycle.
- Participated in Agile development processes, including sprint planning, implementation, testing, and feature delivery.

PROJECTS

Turkeetit – Web Admin & Backend System 🔗

Built a full-stack Web Admin Panel and backend system for a home services platform using React.js, Node.js, Express.js, and MySQL. Implemented user management, service categories, booking management, order processing, partner assignment, payment handling, and administrative operations. Integrated RESTful APIs, JWT authentication, role-based access control (RBAC), and Razorpay payment gateway while ensuring scalable architecture, secure data management, and optimized database performance.

Tech Stack: React.js, Node.js, Express.js, MySQL, JavaScript, RESTful APIs, JWT Authentication, RBAC, Razorpay, Git

Turkeeit – Consumer Mobile App

Created a Flutter-based consumer application for home service booking with OTP authentication, service discovery, cart management, slot scheduling, address management, and real-time order tracking. Integrated RESTful APIs, Razorpay payment gateway, online payments, and Cash on Delivery (COD) workflows to deliver a seamless mobile booking experience.

Tech Stack: Flutter, Dart, RESTful APIs, OTP Authentication, JWT Authentication, Razorpay, MySQL, Android Studio

Turkeeit – Partner Mobile App

Developed a Flutter-based partner application enabling service professionals to manage bookings, update service statuses, process cancellations, and track earnings and payouts. Implemented JWT authentication, role-based access control, and real-time API integration to streamline operations, improve workflow efficiency, and ensure secure data handling.

Tech Stack: Flutter, Dart, RESTful APIs, JWT Authentication, RBAC, MySQL, Git, Android Studio

SKILLS	
Languages JavaScript, HTML5, CSS3, Learning Typescript	Frontend Technologies React.js, React Router, Redux, Bootstrap, Axios, Responsive Web Design, State Management
Backend Technologies Node.js, Express.js, REST API Development, JWT Authentication, OTP Authentication	Database MySQL, MongoDB
Mobile App Development Flutter, Android Studio	Architecture & Security: JWT Authentication, OTP Authentication, Authentication & Authorization, Role-Based Access Control (RBAC), MVC Architecture
Tools & Platforms Git (version control) Postman, VS Code, Figma, phpMyAdmin, PM2, Nginx	Core Skills Full Stack Development, Frontend Development, Backend Development, RESTful API Development, API Integration, Database Design, Database Management, CRUD Operations
Development Practices: Responsive Web Design, State Management, Debugging, Performance Optimization, Deployment, Software Development Life Cycle (SDLC)	

EDUCATION	
B.E. Computer Science, Everest College of Engi. & Technology (EESCOET) CGPA: 7.0	07/2021 – 05/2025 Aurangabad, India
Diploma in Computer Science, Government Polytechnic Osmanabad GPA: 7.9	06/2014 – 05/2017 Osmanabad, India

CERTIFICATES	
Certificate of completion MERN Full Stack Development
